

## Overview

At The IT Training Surgery we know that making time for learning new skills to improve your performance can be a challenge. Courses run at your premises and on your own computers.

## Who should attend?

This course is for people wishing to take the next step on from the basics of Photoshop who are particularly interested in working with graphics. You will be encouraged to be creative: once you have mastered the techniques, this product is only limited by your creative potential!

## Requirements

Participants require a basic understanding of Layers, the History Palette and the main tools in Photoshop.

## What will I learn?

In particular you will be able to:

- Create and save Paths and other selections
- Use quick masks to modify a selection
- Posterise a photo
- Apply creative filters to transform your image
- Use layers to combine shapes and images, and apply styles to your shapes
- Create a graphic from a photo
- Create text effects which combine images within text
- Create your own unique poster by combining all of the skills learnt

## Time Table

### Session 1
